# BG10P – Powerful Recorder

BG10P provides not only perfect gateway function but also flexible recorder solution. BG10P may totally replace the traditional analog telephone recorder.
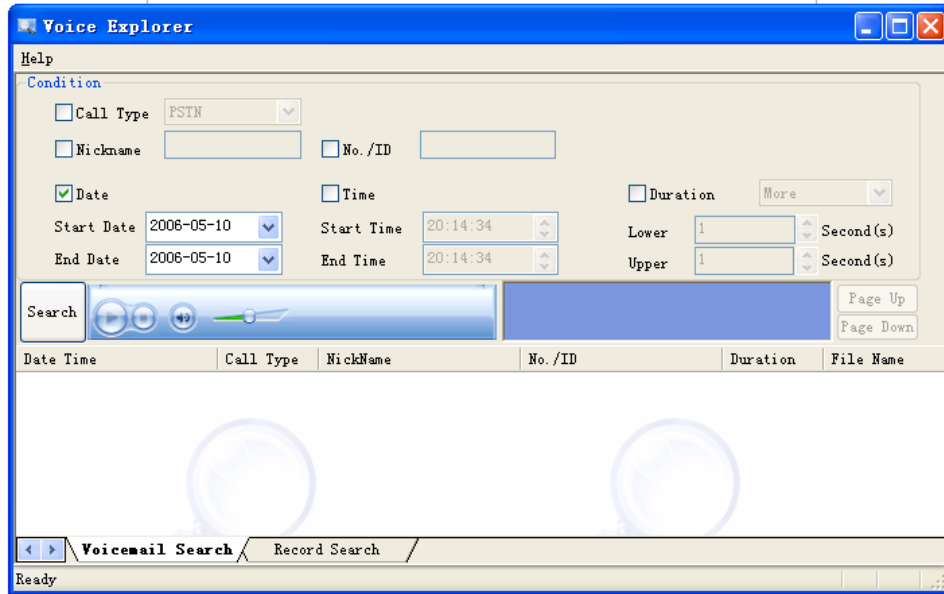

The features of BG10P recorder solution:

- BG10P provides two recording method: manual and automatic recording

Manual recording means user can start recording anytime in talking. It is convenient to operate BG10P recording on telephone keyboard. User can press #3 to start and #4 to stop. If user does not stop recording at the end of talking BG10P will automatically stop recording.

Automatic recording means that BG10P automatically record ever talk without user's operation.

- BG10P can record both PSTN and VoIP talk
- BG10P provides powerful recording search. User can search voicemail or recording conveniently.

- BG10P also provides recorder like the Windows one. User can record any voice according to his wish.
