

USB SIM Card Reader / Writer

- High quality All-in-one Metal **Memory Card Reader**
- QUALITY IS 100% GUARANTEED
- Color: Same as shown in above picture
- USB powered
- Sim Card 32k,Phone Book Entry's 200,Message Storage 40
- Store up to 6 GSM Sim Phone numbers
- Perfect for users with more than one phone number
- Easy edit of phone book and SMS
- Advanced high speed Sim card reader for the fastest Sim decoding speed
- Avoid the potential risk of losing sim cards (and, therefore, the data contained such as phone book) that results from having too many Sim cards
- Avoid damage (on the Sim card and the handset) that results from frequent swapping of Sim cards
- Combine all frequently used Sim cards in just one Super Sim card
- While using the Super Sim cards, activate the desired number by pressing a couple of keys, leaving the security of the Sim card unaffected
- Unlimited re-write / re-read of the data, meanwhile, the data contained in the original Sim cards can be kept
- Easily switch the number or network you require to prevent excessive phone bills
- Easily edit personal phone book, short message and the starting screen. In addition, all data can be saved in the computer as a copy to avoid risk of losing data should the mobile be lost
- Easily draw personalized picture for your mobile phone (Nokia only)
- Change and manage phone numbers, either by PIN or new ' MultiNumber' menu on your phone
- Will work with V1 & some V2 Sim cards. This product is not 100% Guaranteed to be compatible with all Sims
